

Surrounds, Parklets  
Planter Seats

# Surrounds, Planter seats and Parklets

Made with the option of

- Stained FSC sourced wood
- Recycled plastic bottles

Combining the time saving, water saving and cost saving benefits of our 7 day watering planters:

- With the beautiful aesthetics of the stained timber
- or
- With the sustainability and waste combating recycled plastic providing the look of wood, with the durability of plastic

For PMS1

# Parklet with wood & 1 bench

2x PMS1 & 1x PWB1250

# Parklet with recycled plastic and bench

2x PMS1 & 1x PWB1250

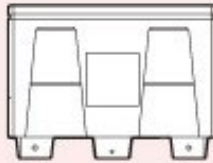

Our Planters have a large integral water reservoir enabling them to go 7 days without the need to re-fill their reservoir with nutrient enriched water, this saves money by reducing the number of times crews have to go out to water them, also reducing the amount of water wasted and the corresponding impact to the environment. All our planters are made from tough and maintenance free, recycled polyethylene, that does not fade and is resistant to the effects of UV light. All scrapped and damaged planters can, in turn, be recycled.

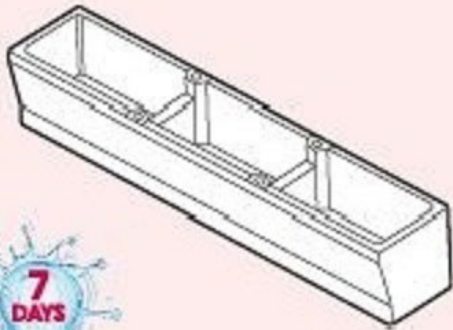

**One Tier Specification:**

- 1000mm x 1000mm x 730mm
- Water reservoir capacity 395 litres
- Compost capacity 400 litres

**REF: PMS1**

**One Tier**
