
idverde
Edition 2026

100% RECYCLABLE
AND/OR RECYCLED

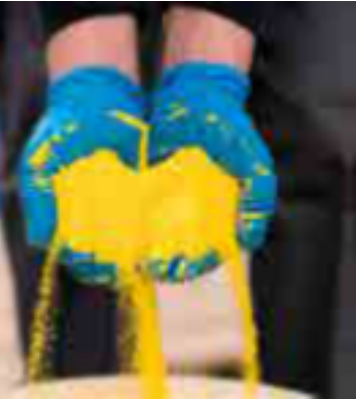

As part of our commitment to environmental preservation, Idverde is continually advancing its recycling processes.

We also offer the opportunity to return end of life Idverde products, including pots, balcony boxes and planters which are then cleaned, cut, crushed and micronized enabling their reintegration into the production cycle.

All black-coloured items are made from this recycling loop, reinforcing our com-mitment to a sustainable production.

Each product thus becomes the raw material of tomorrow where every planter contributes to responsible manufacturing.

Together, we transform today's waste into tomorrow's solutions.

HDPE rotomouled

High Density Polyethylene

Our products are manufactured using rotational moulding, a specialize process that shapes HDPE by rotation, producing extremely durable and long-lasting products.
The row material is pre-coloured at the source, offering anti-UV stabilization.
Going from three millimetres to eight millimetres, our products offer a superior strength and durability.
All products come with a 10-year warranty against corrosion, ensuring exceptional durability, even in demanding environments.

Each rotational moulding piece is hand-assembled and finished to meet Idverde's high quality standards with rigorous quality control at every production stage.

Pot VOGUE

SPECIAL FINISH
CORTEN EFFECT

Our Corten effect finish captures the aesthetic and tactile essence of genuine Corten steel, known for its natural patina and rust-like appearance, which evolves over time.

Each hand-finished piece, with its shades and details, is unique.

This handcrafted technique, combined with HDPE, delivers a distinctive and timeless look along with exceptional durability.

The unique character of each piece makes it even more precious, with subtle nuances and details that vary from one to another.
